S SIDHARTH

Software Engineer | Full Stack • Backend • AI & Distributed Systems

Trivandrum, Kerala, India | +91 9496225620 | callmesidhu.x@outlook.com | callmesidhu.xyphx.com | LinkedIn: callmesidhu | GitHub: callmesidhu

SUMMARY

Software Engineer, engineering founder, and aspiring Forward Deployed Engineer with hands-on experience building and deploying production-grade software across full-stack applications, backend systems, distributed architectures, cloud infrastructure, and AI-powered solutions. Building software since 2018, with experience spanning client-facing engineering, technical problem-solving, requirements analysis, system architecture, API development, CI/CD automation, and production deployment. As Founder and Engineering Lead at XyphX, lead end-to-end engineering across client projects, open-source platforms, and DOTX, an autonomous multi-agent AI software engineering platform. Experienced in translating business and technical requirements into scalable, reliable solutions, collaborating with cross-functional teams, and owning projects from problem discovery and solution design through implementation, testing, deployment, and iteration. Strong interest in Forward Deployed Engineering, AI-native product development, enterprise automation, and bridging the gap between customer problems and practical engineering solutions.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, Go, C++
Backend: Node.js, FastAPI, Spring Boot, ASP.NET, DRF
Frontend: React, Next.js, Flutter
Databases: PostgreSQL, MongoDB, MySQL
Cloud & DevOps: AWS, Azure, Docker, Kubernetes, GitHub Actions, Jenkins, Linux
Systems: REST APIs, gRPC, WebSockets, Microservices

EXPERIENCE

XyphX — Founder & Engineering Lead *Feb 2025 – Present*
Student Startup | Trivandrum, India

- Founded and led engineering at **XyphX**, a student-led software startup developing **AI products, open-source platforms, and custom software solutions** for external clients.
- Led development of **ShowMySkills**, an open-source platform, coordinating and mentoring **10+ interns** across frontend and backend engineering.
- **Currently developing DOTX**, an autonomous AI software engineering platform that transforms **PRDs, FRDs, and software specifications into tested codebases** through specialized AI agents.
- Designed and delivered **multiple custom software solutions for external clients**, owning technical requirements, architecture, development, deployment, and delivery.

Alphatech Enterprises — Software Engineer | Part-Time, Contract-Based *Nov 2025 – Nov 2026*
Dubai, UAE | Remote

- Promoted from Full Stack Developer Intern to Software Engineer within **1 month** based on performance and contributions.
- Build and maintain backend services and mobile app features using Flutter, Fastify, and MongoDB, deployed on **Azure**.
- Automated CI/CD using **Jenkins and Docker**, reducing manual deployment steps and standardizing build, test, and release workflows.
- Develop and integrate **REST APIs** for application features, implementing backend business logic and improving reliability across application components.

SecNode — Backend Developer Intern *May 2025 – Oct 2025*
Berlin, Germany | Remote

- Built an **automated security analysis platform** using microservices to analyze uploaded Android APKs for vulnerabilities and generate security reports.
- Engineered secure and optimized **REST APIs using Node.js and PostgreSQL**.
- Integrated external cybersecurity testing tools for automated threat detection and developed a **phishing URL analysis module** for evaluating suspicious links.
- Implemented authentication mechanisms and optimized database schemas for faster data retrieval.
- Contributed to Android application security and anti-phishing initiatives.

Obsidyne —Full Stack Developer Intern *Feb 2025 – Jan 2026*

Trivandrum, India | Hybrid

- Contributed to the development and delivery of **3 production client projects** as part of engineering teams, translating client requirements into scalable web applications

IEEE Kerala Section — Backend Developer Intern *2025*

Kochi, India | Remote

- Planned backend architecture and project requirements using **NestJS and TypeScript**, with development workflows managed through **Jira and Bitbucket**, and participated in NestJS training.

MuLearn Foundation — Frontend Developer Intern *2025*

Trivandrum, India | Hybrid

- Maintained and refined **React.js applications** by implementing assigned UI changes, resolving bugs, and improving existing frontend components based on project requirements.

SOFTWARE ENGINEERING PROJECTS

DOTX — Autonomous AI Software Engineering Platform

Ongoing · B.Tech Final Year Project · XyphX

- Developing a **multi-agent AI software engineering platform** that dynamically forms specialized engineering agents to analyze requirements, generate code, test, review, optimize, and deliver software.
- Architected a distributed microservices system using **ASP.NET, Spring Boot, FastAPI, Go, Avalonia .NET, and MinIO**, communicating through **gRPC and REST**.
- Deployed AI inference workloads on an **HPC cluster with 8× NVIDIA A100 80GB GPUs (640GB aggregate VRAM) and 2TB RAM**, with backend services running on an Intel Xeon server with 128GB RAM; authentication services deployed on AWS.
- Implemented **CI/CD with GitHub Actions** for automated build, testing, and deployment across the distributed services.

Space Mesh Network

- Designed a decentralized delay-tolerant network (DTN) architecture with 3 satellite nodes, 3 relay nodes, a Go-based intermediate node, and a Node.js destination node using LoRa, ESP32, Arduino, and Raspberry Pi.
- Implemented priority-based store-and-forward routing using a Rust blockchain, PostgreSQL, WebSockets, and Kubernetes for secure, resilient data delivery during network outages.
- Built a real-time observability dashboard tracking link health, queue depth, buffer utilization, acknowledgements, and end-to-end message latency.

EDUCATION

Bachelor of Technology (B.Tech) in Industrial Engineering *Aug 2023 – Mar 2027 | Expected*

College of Engineering Trivandrum (CET), Trivandrum, India

Relevant Coursework: Object-Oriented Programming (OOP), SQL, Python, Data analysis

Higher Secondary Education (Computer Science) *Jun 2020 – Mar 2022*

GHSS Punalur, Kollam, India

Relevant Coursework: Data Structures & Algorithms, Database Management Systems

LEADERSHIP

Web Team Head — CET Technical & Cultural Organizations *2024 – 2026*

- Led web development teams for **Dhwani24, Drishti26, Nexera24, Nexera26, IEDC-CET** and **AeroCET** overseeing development and digital platforms across multiple college events and organizations.

ACHIEVEMENTS

- 1st Prize, Satwa26 National Hackathon (2026)
- 1st Runner-Up, Coderecet x Armada Hackathon (2026)
- 3rd Place, District-Level Web Designing, Kollam, Kerala, India (2020)
- 2nd Place, Sub-District-Level Web Designing, Punalur, Kerala, India (2019)
- 100+ software projects, 5,000+ GitHub contributions
