Summary

Full Stack Software Engineer with experience building scalable web applications, REST APIs, cloud-native systems, and modern frontend applications using React, Next.js, Node.js, TypeScript, PostgreSQL, Docker, and AWS. Developed 100+ projects and contributed to multiple production-grade systems across software engineering, backend development, cloud infrastructure, and DevOps.

Technical Skills

Languages	JavaScript, TypeScript, Python, C, C++, Java, PHP, Dart, Rust, Go, HTML5, CSS3
Frontend	React, Next.js, Vue, Nuxt, SvelteKit, Flutter, React Native, Tailwind CSS, Redux
Backend	Node.js (Express), NestJS, Fastify, Django, FastAPI, Flask, Laravel, Spring Boot, Go Fiber
Databases	PostgreSQL, MongoDB, MySQL
Cloud & DevOps	Docker, Kubernetes, AWS, Oracle, Azure, Jenkins, CI/CD Pipelines, GitHub Actions, Linux, Cloud Computing, Nginx
Tools	Git, Firebase, Supabase

Professional Experience

Dec 2025–Present	Software Engineer Full Stack Engineer Full Stack Developer Intern, Alphatech Enterprises, Dubai, UAE (Remote) - Developed scalable web and mobile applications using Flutter, Fastify, MongoDB, Azure, Docker, and Laravel. - Built and optimized APIs, databases, and cloud deployment workflows to enhance performance and reliability. - Promoted from Intern to Software Engineer within 7 months.
Aug 2025–Feb 2026	Technical Manager, PgBee, Trivandrum, India (Onsite) - Built the product workflow architecture and managed the Frontend, App, and Backend team leads for a comprehensive hostel management system. - Oversaw cloud infrastructure deployments to ensure high availability and continuous delivery of services.
Mar 2025–Feb 2026	Backend Developer Intern, IEEE Kerala Section, Kochi, India (Remote) Planned and started backend microservices utilizing NestJS and TypeScript.
May 2025–Oct 2025	Backend Developer Intern, SecNode, Berlin, Germany (Remote) - Engineered highly secure and optimized RESTful APIs utilizing Node.js and PostgreSQL. - Implemented robust authentication mechanisms and optimized database schemas for rapid data retrieval. - Handled cybersecurity initiatives, specifically focusing on Android application security and anti-phishing measures.
2025	Frontend Developer Intern, MuLearn Foundation, Trivandrum, India (Remote) Engineered dynamic, responsive user interfaces utilizing React.js.

Software Engineering Projects

AURA (Adaptive Uncertainty & Resilient Architecture)

- Engineered a decentralized IoT disaster detection platform supporting autonomous hazard response, resilient mesh networking, and offline emergency communication.
- Implemented real-time data streaming using WebSockets and integrated OpenStreetMap APIs for live location tracking and geospatial intelligence.
- Developed a Dockerized FastAPI backend with SQLite and a Rust-based blockchain, complemented by a Flutter application and automated workflows using n8n.

Automated Security Analysis Platform

- Created microservices using Node.js and PostgreSQL to analyze uploaded Android APKs for vulnerabilities and generate comprehensive security reports.
- Integrated external cybersecurity testing tools into the system for automated threat detection.
- Implemented a phishing link analysis module that evaluates suspicious URLs and provides detailed vulnerability insights.

Space Mesh Network

- Designed a decentralized DTN architecture with 3 satellite nodes, 3 relay nodes, a Go-based intermediate node, and a Node.js destination node using LoRa, ESP32, Arduino, and Raspberry Pi.
- Implemented priority-based store-and-forward routing with Rust Blockchain, PostgreSQL, WebSockets, and Kubernetes to ensure secure and resilient data delivery during network outages.
- Developed a real-time observability dashboard for tracking link health, queue depth, buffer utilization, acknowledgements, and end-to-end message latency.

Open Source Contributions

- 100+ software projects
- 3,000+ GitHub contributions
- Full-stack applications developed using React, Next.js, Node.js, Django, and FastAPI

Education

Aug 2023–Mar 2027	Bachelor of Technology (B.Tech) in Industrial Engineering , <i>College of Engineering Trivandrum (CET)</i> , Trivandrum, India
	Relevant Coursework: C Programming, C++, Object-Oriented Programming (OOP), SQL
Jun 2020–Mar 2022	Higher Secondary Education (Computer Science) , <i>GHSS Punalur</i> , Punalur, India
	Relevant Coursework: C++, Data Structures & Algorithms, PHP, JavaScript, HTML, CSS, DBMS, SQL

Leadership

2024–2026	Webmaster , <i>NexeraCET</i> Led web infrastructure and development as Webmaster for the 2024 and 2026 editions.
Oct 2026	Webmaster , <i>IEDCCET</i> Managed the digital presence and web platforms.
Feb 2026	Webmaster , <i>AeroCET</i> Directed web development and maintenance initiatives.

Achievements

Hackathons	1st Runner-Up, Coderecet x Armada Hackathon (2026) & 1st Prize, Satwa '26 National Hackathon (2026)
Web Design	3rd Place, District-Level Web Designing, Kollam (2020) & 2nd Place, Sub-District-Level Web Designing, Punalur (2019)
