

Professional Summary

Analytical and performance-driven professional transitioning from a strong software engineering background into dedicated Data Analyst and Business Analyst roles. Specialized within an Industrial Engineering lab environment focusing on high-performance data analysis optimization, utilizing C++ CPLEX optimization methodologies to process heavy analytical computations. Highly skilled in SQL, Python, and R to translate complex business challenges into data-driven strategies. Experienced in building multivariate IoT anomaly models, executing statistical analysis, and preparing executive-level strategy presentations for stakeholder decision-making.

Technical Skills

Optimization & Core	C++ CPLEX Optimization, Data Analysis Optimization, Industrial Engineering Analytics, SQL, Python (Pandas, NumPy), R Language, Jupyter Notebook, Microsoft Excel
Business Intel	Power BI, Business Analysis, Market Research, KPI Analysis, Strategy Presentations, Reporting
Advanced Analytics	Machine Learning (Regressions, Clustering), Deep Learning Fundamentals, Predictive Modeling, Exploratory Data Analysis (EDA)
Databases & Tools	PostgreSQL, MySQL, MongoDB, Supabase, Firebase, Git, GitHub, n8n

Professional Experience

May 2026–Jun 2026	Business Analyst (Freelance), PgBee, Trivandrum, India (Remote) - Conducted a rigorous data-backed business analysis evaluating regional hostel expansion opportunities. - Structured a comprehensive expansion strategy presentation utilizing R, SQL, PowerPoint, and Word to model competitor benchmarks and target demographics. - Generated detailed financial and occupancy projection reports to facilitate executive stakeholder alignment. - Formulated KPI-driven evaluation frameworks to track, monitor, and assess location-based market demand and growth potential.
Dec 2025–Present	Project Intern, Alphatech Enterprises, Dubai, UAE (Remote) - Optimized large-scale PostgreSQL and MongoDB database schemas and queries, accelerating report generation and data pipeline efficiency. - Handled continuous system analytics to identify bottlenecks within operational workflows, improving backend resource utilization. - Converted technical data metrics into clear, visual business intelligence reports and KPI dashboards for non-technical stakeholders.

Analytics Projects

2026	PgBee Expansion Analytics, Business Strategy & Analysis, GitHub Repo - Conducted expansion research utilizing R and SQL to query and clean real PostgreSQL data extracted directly from the PgBee production database. - Authored professional strategic briefs and pitch decks outlining actionable, data-driven revenue models. - Modeled growth scenarios and operational feasibility metrics to define optimal pricing tiers for newly targeted regions.
------	---

- 2026 **IoT Sensor Analysis**, *Satwa '26 National Hackathon Winner*, GitHub Repo
- Developed a custom sensor analytics suite as part of the Satwa '26 Hackathon, securing **First Prize**.
 - Engineered purely in **Python** using **Jupyter Notebook** to ingest and process real-time, multivariate sensor datasets.
 - Focused on identifying operational limits and anomaly thresholds to alert downstream networks of catastrophic sensor failures.

- Ongoing **E-Commerce Business Analytics**, *Ongoing (Not Completed)*, GitHub Repo
- Developing an end-to-end e-commerce pipeline with a balanced focus of **20% Data Analysis, 30% Data Science, 30% Machine Learning, and 20% Deep Learning**.
 - Utilizing **Python** to analyze customer purchasing behavior, segmentation patterns, and sales transaction trends.
 - Building predictive modeling algorithms to forecast seasonal inventory demands and customer churn cycles.

Education

- Aug **Bachelor of Technology (B.Tech) in Industrial Engineering**, *College of Engineering Trivandrum (CET)*, Trivandrum, India
- 2023–Mar
- 2027 - *Academic Laboratory Focus*: Data Analysis using R, C++ CPLEX Optimization, Supply Chain Logistics Management, Operational Research.
- *Relevant Coursework*: SQL Database Management, Computer Programming, Object-Oriented Programming (OOP), Statistics.
- Jun **Higher Secondary Education (Computer Science)**, *GHSS Punalur*, Punalur, India
- 2020–Mar
- 2022 - *Relevant Coursework*: C++, Data Structures & Algorithms, Database Management Systems (DBMS), SQL, Web Design.

Leadership & Achievements

- 2024–2026 **Webmaster (NexeraCET, IEDCCET, AeroCET)**: Directed web infrastructure and database optimization, streamlining web platform deliveries for major college events.
- 2026 **Hackathons**: First Prize Winner (Satwa '26 National Hackathon for analytics-driven IoT solution) & 1st Runner-Up (Coderecet x Armada Hackathon 2026).
- Ongoing **Open Source & Dev Velocity**: 3,000+ GitHub contributions and 100+ projects demonstrating exceptional problem-solving and technical passion.
